Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to punctum plug, classified in class 424, subclass 427.
- II. Claims 9-15, drawn to a system for determining positioning of punctum plug, classified in class 305, subclass 205+.
- III. Claims 16-21, drawn to apparatus for viewing a punctum plug, classified in class 422, subclass 82.07+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, unaided eye, as well as, any known optical device capable of detecting fluorescent or visual dyes can practice the process of determining the positioning of punctum plug.

Inventions I and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for using the product and the apparatus can be used for a different product or (2) that the product as claimed can be used by another and materially different apparatus (MPEP § 806.05(g)). In this case, unaided eye or even other known optical devices capable of detecting fluorescent or visual dyes can view the product.

Art Unit: 1617

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the position of punctuam plug can be practiced by a system with unaided eye.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and further the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

A telephone call was made to John Posa on September 23, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
